

## CAFM/IWMS Implementation Packages

The intent of this chart is to provide a sampling of the services associated with a CAFM/IWMS implementation and how they could be categorized into packages. However, any service can be performed as part of any package.

As an FM:Systems Certified Business Partner, FM Innovations utilizes FM:Systems proven RightPath implementation process as the core of our implementation services. Our RightPath Plus process provides additional services outside the standard RightPath package.

**RightPath Lite** - Standard out-of-the-box configuration utilizing the standard demo data

**RightPath** - Standard out-of-the-box configuration and tailored to customers needs

**RightPath Plus** - RightPath implementation with additional configuration/customization and services to meet customers specific requirements

	Standard Package
	Out-of-the-Box Configuration
	Custom Configuration
	Optional Service

	RightPath Lite Web-Based	RightPath Web-Based	RightPath Plus Web-Based
